

Update

Quarry Innovation Center

We are proud to share with the Brisbane community that we recently submitted updated project documents to the City for the Quarry Innovation Center project proposed at the Guadalupe Quarry.

Informed by extensive community feedback, the updated project has been reduced to a single 892,000 sq. ft., two-level building for advanced manufacturing on approximately 61 acres of the quarry site.

Advanced manufacturing at the quarry site has the potential to bring more than 1,000 high quality jobs to the region, while reducing truck traffic and noise.

Community Outreach

(to date) has included:

- Two in-person open houses
- Six one-hour sessions of Zoom Open Office Hours
- Advanced Manufacturing webinar on October 2

More Info.

including Zoom Open Office Hours
