QUARRY INNOVATION CENTER

We've heard you.

We've heard your concerns about the Quarry Innovation Center, and we're listening.

The Quarry Innovation Center is **an advanced manufacturing project — not a data center**. Advanced manufacturing requires power to operate the high-tech equipment used to build and assemble products.

The project will provide **millions of dollars to support conservation efforts on San Bruno Mountain** while **permanently ending mining operations** at the quarry, creating **thousands of good jobs**, and generating **millions of dollars in new tax revenue** to support local services and infrastructure.

Our work with the community isn't finished. As the Draft Environmental Impact Report is prepared and recirculated, **we'll continue listening, answering questions and engaging with our neighbors**.

Learn more about the Quarry Innovation Center and what it means for Brisbane.
